📍 Sunny Brooke 2, Brgy. San Francisco, General Trias, Cavite

PROFESSIONAL SUMMARY

Electronics Engineering graduate with hands-on experience in web development, hardware troubleshooting, and IT infrastructure. Proven track record delivering client-focused web solutions and technical support in industrial environments. Seeking opportunities in IT and Electronics Engineering to leverage strong technical skills, problem-solving abilities, and passion for technology innovation.

PROFESSIONAL EXPERIENCE

Freelance Web Developer (Self-Employed)

Self-Employed - General Trias, Cavite | May 2025 - August 2025

- Delivered custom web development solutions for multiple business clients on commission basis
- Developed and deployed responsive, production-ready websites for diverse industries including construction and industrial services
- Managed complete project lifecycle from client consultation to deployment and maintenance
- Configured custom domain setups and web hosting environments for client websites
- Implemented modern web design principles ensuring cross-platform compatibility and optimal user experience
- Maintained ongoing client relationships through technical support and website updates
- Successfully completed multiple projects showcasing strong project management and client communication skills

Electronics Support Intern

Pro Board Technology Services (PBTS) Corporation - Carmona, Cavite | July 2023 - August 2023

- Assisted in troubleshooting and repairing electronic devices and circuit boards
 - Performed circuit analysis, hardware diagnostics, and component testing
 - Provided technical support for system diagnostics and equipment maintenance
 - Supported testing operations to improve quality assurance processes
 - Maintained technical reports and documentation for engineering tasks
 - Gained hands-on experience with industrial IT infrastructure and hardware troubleshooting
 - Applied systematic problem-solving methodologies in real-world technical support scenarios
-

PROJECTS

[Reverse Vending Machine](#) (Academic Capstone Project)

2024

- Designed and implemented embedded system using Arduino Uno and Raspberry Pi integration
- Programmed motor control systems and sensor interfaces for automated bottle processing

- Developed WiFi connectivity and access reward system with network communication protocols for remote monitoring
- Successfully delivered functional prototype demonstrating systems integration capabilities

[MJK Iron Works](#) (Client Website)

2025

- Developed and deployed production website for iron works and metal fabrication business
- Created professional online presence featuring service portfolio and client contact system
- Implemented responsive design ensuring optimal viewing across all devices

[Mabuhay Power & Diesel Generator Services](#) (Client Website)

2025

- Built comprehensive website for diesel generator sales and services company
- Designed user-friendly interface showcasing product catalog and service offerings
- Optimized site performance and mobile responsiveness for target audience

[Renovare](#) (Client Website)

2025

- Developed website for construction and renovation services company
- Created visually appealing design highlighting portfolio of completed projects
- Integrated contact forms and service inquiry functionality

[EchoWallet](#) (Web Application)

2025

- Built custom expense tracking web application for client financial management needs
 - Implemented intuitive interface for logging, categorizing, and analyzing expenses
 - Developed data visualization features for expense insights and budget monitoring
 - Created responsive design for seamless experience across desktop and mobile devices
-

TECHNICAL SKILLS

Programming & Development

- Languages: Python, C/C++, JavaScript, HTML, CSS
- Scripting: Bash (Linux), PowerShell (Windows)
- Web Development: Responsive Design, Front-end Development, Web Hosting, Domain Configuration
- Version Control: Git

Electronics Engineering

- Circuit Design: AC/DC Circuit Analysis, Analog & Digital Circuit Design, PCB Design
- Electronic Systems: Electronic Devices (Transistors, Amplifiers, Op-Amps), System Integration
- Digital Electronics: Logic Circuits, Switching Theory, Sequential Circuits, Microprocessor/Microcontroller Systems
- Communication Systems: Modulation Techniques, Data Communication, Transmission Media & Antenna Design
- Signal Processing: Signal Analysis, Spectra Analysis, Digital Signal Processing, Filtering
- Control Systems: Feedback & Control Systems, System Stability Analysis
- IC Design: Analog Integrated Circuits, Digital Integrated Circuits

- Specialized Areas: Electromagnetics, Broadcast Engineering, RF Systems

IT & Computer Systems

- Operating Systems: Linux, Windows (Installation, Configuration, Maintenance)
- Hardware: PC Assembly, Component Troubleshooting, Hardware Diagnostics, Mobile Device Support
- Networking: Network Fundamentals, TCP/IP, Network Configuration & Troubleshooting
- Systems Management: System Configuration, Virtualization, Cloud Computing Basics
- Security: Basic Cybersecurity Principles, Security Best Practices
- Support: IT Documentation, Ticketing Systems, Technical Support

Tools & Equipment

- Embedded Systems: Arduino, Raspberry Pi
- Engineering Software: MATLAB/Simulink, Computer-Aided Drafting (CAD)
- Lab Equipment: Oscilloscopes, Multimeters, Function Generators, Signal Analyzers

Professional Skills

- Project Management: Agile methodologies, timeline management, deliverable tracking
 - Communication: Client consultation, technical documentation, stakeholder reporting
 - Problem-Solving: Root cause analysis, systematic troubleshooting, innovative solution design
 - Research & Analysis: Data interpretation, literature review, technical research
-

EDUCATION

Bachelor of Science in Electronics Engineering
Emilio Aguinaldo College - Cavite | Dasmariñas, Cavite
August 2020 - May 2024

- GPA: 1.70/5.00 (Dean's Lister 2022-2024)

Relevant Coursework:

- Circuits Analysis & Design
 - Electronics (Devices, Circuit Analysis, Systems Design)
 - Digital Electronics (Logic Circuits, Microprocessor/Microcontroller Design)
 - Communication Systems (Principles, Modulation, Data Communication, Transmission Media)
 - Signal Processing & Spectra Analysis
 - Feedback & Control Systems
 - Integrated Circuit Design (Analog & Digital)
 - Electromagnetics & Antenna Systems
 - Computer Programming
 - Engineering Data Analysis
 - Computer-Aided Drafting
-
